// about

I build software at Imbus AG in Bavaria, where I have spent the better part of seven years working on TestBench, their test management platform, first alongside my computer science degree, now full time.

The path here started in Casablanca, with a technician diploma, a bachelor's degree, and three internships: a software house, a transport insurer, an environmental association. Building a store management tool, moving an insurance application to the web, and putting a non-profit's programme online taught me how differently the same craft looks depending on who it serves.

Then I moved to Germany, took a second bachelor's at the University of Bamberg in Software Systems Science, and kept building the whole way through.

I work in Java, C#, and .NET, with SQL underneath and the web on top.

I also speak four languages, which has been quietly useful in a field where most of the work is understanding what someone actually meant.

// experience

Feb 2026 – Present · 10 mos HEAD

Software Developer — Full-time

Imbus AG · Bavaria, Germany

Full time on TestBench since finishing my degree — feature development, bug fixing, and extending the underlying database.

Aug 2019 – Jan 2026 · 6 yrs 6 mos

Software Developer — Part-time

Imbus AG · Bavaria, Germany

Six and a half years part time on the same product, spanning my entire degree. I joined while I started studying and never left.

Mar 2017 – Jun 2017 · 4 mos

Web Developer — Internship

AESVT Maroc · Casablanca-Settat, Morocco

Rebuilt and extended the association's WordPress site, and brought their programme online — including public voting for the best environmental artwork and ideas.

Jun 2016 – Sep 2016 · 4 mos

Software Developer — Internship

Compagnie d'Assurance Transport · Casablanca-Settat, Morocco

Part of the team that migrated a desktop insurance application to the web, in C# and MS SQL Server.

Mar 2015 – May 2015 · 3 mos — first commit

Software Developer — Internship

NT SOFT · Casablanca-Settat, Morocco

Built a store management application in C# and MS SQL Server. My first professional work.

// projects

ShapeShift · Developer, PO, Tester

I created this app with Claude Code.
